Sybase Open Client Installation Instructions

The opnclnt.exe has been designed to uninstall existing Sybase Open Client files when it detects a prior version on the CPU. In this case, you will need to run the openclnt.exe twice—first to uninstall the existing software, and second to install this new version. You will only need to reboot your system after the actual install of the Open Client software.

If you are installing Sybase Open Client for the first time, ignore the **Uninstall Existing Sybase Open Client Files** instructions.

Uninstall Existing Sybase Open Client Files

1. Save the download **opnclnt.exe** file to **c:\temp**
2. Click on **Start\Run\Browse**
3. Click on **c:\temp**
4. Double click on **opnclnt.exe**
5. Click **OK** at the **Confirm File Deletion** prompt
6. Select the **Don't display this message again** checkbox and click **Yes** if a "**… File Detected**" window appears or click **Ignore** if **Yes** is not an available option
7. Click **Finish**
8. Select the **No, I will restart my computer later** radio button and click **Finish**

Install Open Client

1. Click on **Start\Run\Browse**
2. Click on **c:\temp**
3. Double click on **opnclnt.exe**
4. Click **Next**
5. Click **Next**
6. Select the **Don't display this message again** checkbox and click **Yes** if a "**… File Detected**" window appears or click **Ignore** if **Yes** is not an available option
7. Click **Finish**
8. Select the **Yes, I want to restart my computer now** radio button and click **Finish**
